

Flip for service. Charge together.

A rechargeable restaurant table lamp that combines table ambience with a clear, local service request.

Actual product demonstration. The pictured base is not the full 25-lamp configuration.

FLIP TO RED

Guests can ask for attention without waving or calling across the room.

PLACE TO RECHARGE

Return lamps to the shared base, without plugging a cable into every lamp.

UP TO 25 LAMPS

Specify the matching 25-lamp setup with one 120 W power supply.

A simpler service and closing routine. Agree one red-light request signal with your team. Keep lamps visible from normal service positions, then return them to the matching charging base after use.

Designed for restaurant tables, hotel dining rooms and hospitality purchasing programs.

Technical specifications

Manufacturer-supplied values for quotation and sample selection.

Model	JBTD-137
Product type	Rechargeable restaurant table lamp with a visual service cue
Service signal	Flip the lamp to red to request attention
Tabletop operation	Cordless, powered by the built-in rechargeable battery
Battery capacity	2600 mAh per lamp
Rated lamp power	0.6 W
Charging input per lamp	12 V DC, 0.3 A
Adapter output	12 V DC, 10 A, 120 W
Shared charging capacity	Up to 25 lamps with the matching 25-lamp charging configuration
Plug options	EU, US or UK version
Charging method	Place lamps onto the matching shared charging base; no individual cable connection to each lamp

Specify your restaurant setup

Share your table count, spare-lamp quantity, destination market and plug choice. Confirm dimensions, weight, charging time, runtime test conditions, packaging, commercial terms and the exact adapter documentation with your quotation.

Application note: Red is a visible service cue. Staff must be able to see it; it is not a promise of an electronic alert or immediate response. The 12 V value above is the charging input, not a stated battery-cell voltage.
